Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/662,705

Applicant(s)

WAN, ERNEST YIU CHEONG

Examiner

Jeffrey R. Swearingen

Art Unit

2145

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 June 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 24-50 is/are pending in the application.
- 4a) Of the above claim(s) 32, 41 and 50 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 24-31, 33-40 and 42-49 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/10/2006 has been entered.

Election/Restrictions

2. Claims 32, 41, and 50 were withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected group, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 5/26/2006.

3. Applicant's traversal is not persuasive. Groups I and II are drawn to separate inventions. Group I is drawn to the formation of an address. Group II is drawn to the location of an address. Applicant acknowledged the difference between these two groups of claims in the remarks filed on 3/10/2006. On page 10, Applicant argued newly filed independent claims 24, 33, and 42. On page 11, Applicant argued under a separate section newly filed independent claims 32, 41, and 50. Applicant therefore previously acknowledged the claims were drawn to two separate and distinct inventions, and Applicant's traversal directly conflicts with the evidence of said acknowledgement present in the remarks of 3/10/2006.

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 42-49 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Applicant provided a definition in the originally filed specification that extended the boundaries of a "computer readable medium" to encompass non-tangible embodiments. Originally

Art Unit: 2145

filed specification, page 31, lines 3-4, referring to a "radio or infra-red transmission channel". Support for this is found in Annex IV of the "Interim Guidelines for Examination of Patent Applications for Patent Subject Matter Eligibility", published in the Official Gazette on November 22, 2005.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

7. Claims 24-31, 33-40, and 42-49 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

8. MPEP 2164 gives the grounds of the Test of Enablement. The specification must "describe the invention in such terms that one skilled in the art can make and use the claimed invention". "The information contained in the disclosure of an application must be sufficient to inform those skilled in the relevant art how to both make and use the claimed invention."

9. MPEP 2164.01(a) described the factors to determine whether there is sufficient evidence to support that a disclosure does not satisfy the enablement requirement and whether any necessary experimentation is "undue". These factors include, but are not limited to:

- a. The breadth of the claims;
- b. The nature of the invention;
- c. The state of the prior art;
- d. The level of one of ordinary skill;
- e. The level of predictability in the art;
- f. The amount of direction provided by the inventor;
- g. The existence of working examples; and

Art Unit: 2145

h. The quantity of experimentation needed to make or use the invention based on the content of the disclosure.

10. MPEP 2164.01(b) states "as long as the specification discloses at least one method for making and using the claimed invention that bears a reasonable correlation to the entire scope of the claim, then the enablement requirement of 35 U.S.C. 112 is satisfied.

11. MPEP 2164.01(c) states "if a statement of utility in the specification contains within it a connotation of how to use, and/or the art recognizes that standard modes of administration are known and contemplated, 35 U.S.C. 112 is satisfied.

12. The claims and originally filed specification are egregiously deficient in terms of the enablement requirements put forward by 35 U.S.C. 112, first paragraph.

13. Claims 24-31, 33-40, and 42-49 deal with "monolithic AV content". Applicant admitted this in the response of June 26, 2006. The originally filed specification referred in passing to "monolithic AV content" twice without defining what "monolithic AV content" encompassed.

14. The level of one of ordinary skill in the art is an artisan with a Bachelor's degree in electrical or computer engineering and 2-3 years of industry experience.

15. One of ordinary skill in the art would be unaware of what "monolithic AV content" consisted of. A search of the prior art failed to disclose what one of ordinary skill in the art could construe "monolithic AV content" to mean.

16. The lack of information concerning "monolithic AV content" supports the analysis of the factors that the disclosure would require undue experimentation. The claims are extremely broad, even with the usage of the term "monolithic AV content". The nature of the invention is unclear to one of ordinary skill in the art.

17. Applicant stated that audio-visual data "typically manifest(s) themselves as monolithic blocks of information". Originally filed specification, page 2, lines 3-5. A search of the prior art failed to produce evidence agreeing with Applicant's assertion, as the prior art never referred to the use of monolithic AV data.

Art Unit: 2145

18. One of ordinary skill in the art using the level of the artisan previously presented would be unable to ascertain how to implement the invention as currently claimed with the current specification. One of ordinary skill in the art is unaware of "monolithic AV content".

19. The inventor provided inadequate direction to teach one of ordinary skill in the art the use and implementation of "monolithic AV content". Therefore, one of ordinary skill in the art would necessarily suffer the burden of undue experimentation in implementing this invention.

Claim Rejections - 35 USC § 102

20. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

21. Claims 24-31, 33-40, and 42-49 are rejected under 35 U.S.C. 102(e) as being anticipated by Schmeidler et al. (US 6,763,370 B1).

22. In regard to claims 24, 33, and 42, Schmeidler disclosed:

determining a network address for locating the monolithic AV content; (column 13, lines 49-53)

generating a fragment identifier for at least one fragment corresponding to at least one of said levels of data of said monolithic AV content, using the logical model; (column 14, lines 1-38)
and

combining the network address and the fragment identifier to form a URI reference, being an address for locating the AV fragment (column 14, lines 24-26).

23. In regard to claims 25, 34, and 43, Schmeidler disclosed:

providing an addressing scheme for addressing said at least one fragment to the levels of detail of said logical model. (column 2, lines 47-65; column 13, lines 40-67)

24. In regard to claims 26, 35, and 44, Schmeidler disclosed:

the addressing scheme for addressing said at least one fragment includes at least one of a time axis, a time function, a region axis, and a region function. (column 13, lines 50-67. The region axis and region function is the location on the server of the title. Time axis and function is provided in column 4, lines 7-22)

25. In regard to claims 27, 36, and 45, Schmeidler disclosed:

the fragment identifier is determined based on a hierarchical representation of the monolithic AV content generated by applying the logical model. (column 14, lines 1-38)

26. In regard to claims 28, 37, and 46, Schmeidler disclosed:

the monolithic AV content is a single file in a file system supporting Audio/Video content. (column 1, lines 35-55; column 2, lines 35-56)

27. In regard to claims 29, 38, and 47, Schmeidler disclosed:

the monolithic AV content is one from the group consisting of a Digital Versatile Disk (DVD), Compact Disk Read Only Memory (CD ROM), Audio Compact Disk (CD), Video Tape and Audio Tape. (column 1, line 64 – column 2, line 3)

28. In regard to claims 30, 39, and 48, Schmeidler disclosed:

said addressing scheme is Xpath based. (column 17, lines 37-51; column 18, lines 1-18)

29. In regard to claims 31, 40, and 49, Schmeidler disclosed:

the addressing scheme provides a syntax for addressing one or more AV fragments in the fragment identifier. (column 13, lines 53-63)

Conclusion

30. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
